

Rubric for Simple Machines Lesson

Note: this "partial rubric" approach can be applied to many different assignments. Provide a rubric like the one below, only partially completed, and work with the students to figure out the "missing" sections.

	5 points	3 points	1 point
Content: Simple Machines		Describe 4 simple machines and how they are used	
Illustrations	All illustrations show how simple machines are used at our school		
Conventions		Several convention errors that are distracting to the reader	
Format			Background, font, transitions are distracting. Missing either a title slide or a conclusion
Cooperation			The team didn't work well together. They argued and didn't collaborate
